
CB profile redirection

Posted by lenamtl - 2008/10/06 07:24

Hi,

I need to make a redirection to the user profile if the profile % completion is not reach.

Is there a way to do it using Community Builder User Redirection?

I'm already using a % completion module with no redirection.

S4J Profile Status Indicator

Currently it does not accept input from the Profile Status Indicator. I personally have no intention of adding this feature, unless I see that there is a great need for it.

My current goal is getting it ported to J!1.5.

Thanks for stopping by and looking.
